

Chapter 12

DTD for Firewall Filter Response Tags

This chapter contains the document type definition (DTD) called `junos-filter.dtd`, which lists the tags returned by the JUNOScript server to describe firewall filter information. The associated Extensible Markup Language (XML) namespace is <http://xml.juniper.net/junos/5.6R1/junos-filter>. To review reference pages for the tags, see “Summary of Firewall Filter Response Tags” on page 142.
